

Mind Map Overview

To visualise and organise the testing scope for the **Note Master**, a detailed **mind map** was created. This mind map provides a comprehensive breakdown of all the key areas tested, including functional workflows, non-functional aspects, and critical scenarios.

The mind map serves as a guiding framework for the following:

1. **Identifying Testing Areas:** Covers login, Meditation, Profile, Create Notebook, Write Notes and more.
2. **Non-Functional Testing Focus:** Highlights performance, usability, and responsiveness testing.
3. **Dependencies:** Maps out module interconnections
